Programme

Time	Topic	Presenter
10:30 – 10:40 BST (UTC+1)	Introduction	Diana
10:40 – 11:05 BST (UTC+1)	Development priorities	Diana
11:05 - 11:15 BST (UTC+1)	Discussion	
11:15 - 11:25 BST (UTC+1)	Coffee break	
11:25 – 11:50 BST (UTC+1)	Research Outputs demonstration and discussion	Glenys/Diana
11:50 – 12:00 BST (UTC+1)	Summary	Diana

Latest developments

- Research Outputs feature (Roadmap version) has been deployed
- Upgrade to operating system to live server tomorrow, 23 August 2023
- Next: deployment of Roadmap v4.1.0
- Development of Bootstrap ongoing

DMPonline events

- Forthcoming user group meetings
 - 19 September 2023
 - 21 November 2023
 - 23 January 2024
 - 19 March 2024
 - 21 May 2024
- DMPonline at IDCC 2024, <https://www.dcc.ac.uk/events/idcc24>

DMPonline development priorities

- Goals
 - Increase machine-actionable capability
 - Increase use of permanent identifiers
 - Increase use of digital object identifiers
- New features
 - Deploy integration with Research Organization Registry (ROR)
 - Dynamic grant ID field
 - New plan creation wizard
 - Integration with RSpace

Machine-actionable organization field

New DMP creation wizard

- Current plan creation wizard automatically selects a template
- New plan creation wizard will offer a menu of appropriate templates
- Image to the right illustrates scenario for University of Edinburgh user having entered AHRC as a funder.

Research Data Service

Create a new plan

Before you get started, we need some information about your research project to set you up with the best DMP template for your needs.

*What research project are you planning?
 mock project for testing, practice, or educational purposes

Use these filters to select a template

* Select the primary research organisation
Organisation
 - or - No research organisation associated with this plan or my research organisation is not listed

* Select the primary funding organisation
Funder
 - or - No funder associated with this plan or my funder is not listed

Sound transitions

May contain sensitive data? May contain personally identifiable information?

Intended repositories

OLAC [Remove](#)

OLAC, the Open Language Archives Community, is an international partnership of institutions and individuals who are creating a worldwide virtual library of language resources by: (i) developing consensus on best current practice for the digital archiving of language resources, and (ii) developing a network of interoperating repositories and services for housing and accessing such resources.

[Add a repository](#)

Metadata standards

TEI (Text Encoding Initiative) Guidelines [Remove](#)

The Text Encoding Initiative (TEI) Guidelines make recommendations about suitable ways of representing those features of textual resources which need to be identified explicitly in order to facilitate processing by computer programs. They specify a set of XML tags in order to mark the textual metadata, text structure, relationship between images and transcriptions and other features of interest. They therefore primarily define a data format, but the TEI Header in particular includes a native set of metadata and may include metadata from other schemas.

In their decades of community driven development they have developed into a de-facto standard in the production of textual data in the humanities. Since the release of version P5, 2 to 4 new revisions have been released each year.

<http://www.tei-c.org/Guidelines/P5/>

Research Outputs – your feedback

- Cascade filters
- Improve search function for fields such as repository
- Display available options in drop-down list
- Provide tooltips and on-screen explanations
- Make each research output a hyperlink
- Research domain – not the best classification
- Perhaps add status for research output, e.g. ‘Planned’, ‘In progress’, ‘Completed’

Research Outputs – advanced

- Feature to enable administrators to:
 - Set preferred repositories
 - Set preferred licence
- Display help on the right side of the page, same way as guidance
- Can some of the fields be used individually, e.g. metadata standards and inserted in the template
- Can the feature be switched on/off
