

# Assessing Skills, Training, Positions, and Partnership to Support Growing Research Data Management Services Support: Findings from the 2013 ARL SPEC Kit #334

Barbara Pralle, Data Management Services, Johns Hopkins University Sheridan Libraries, [bpralle@jhu.edu](mailto:bpralle@jhu.edu)  
Sherry Lake, Research Data Services, University of Virginia Library, [shLake@virginia.edu](mailto:shLake@virginia.edu)

## Key Findings

### RDM Service Offering

### Skills and Training

#### Ranked as Important Skills

1. Subject domain expertise	75%
2. Digital/data curation expertise	60%
3. IT experience	59%

#### Background for current positions (n=228)

MLS/ MLIS	75%
Data curation emphasis	6%
Masters in another domain specialty	27%
PhD in another domain specialty	13%

### Challenges

Theme	Responses	% w/ theme
Collaboration campus-wide	18	37%
Funding	17	35%
Faculty Engagement	15	31%
Technology Infrastructure	13	27%
Limited Staffing	12	24%
Marketing Services	12	24%
Staff Training	11	22%
Scoping services	9	18%
Institutional commitment	7	14%
Faculty education on need	5	10%
Evaluating demand	4	8%
Other	3	6%
Scaling service expansion	3	6%
Funding Agency ambiguity	2	4%

## Key Findings

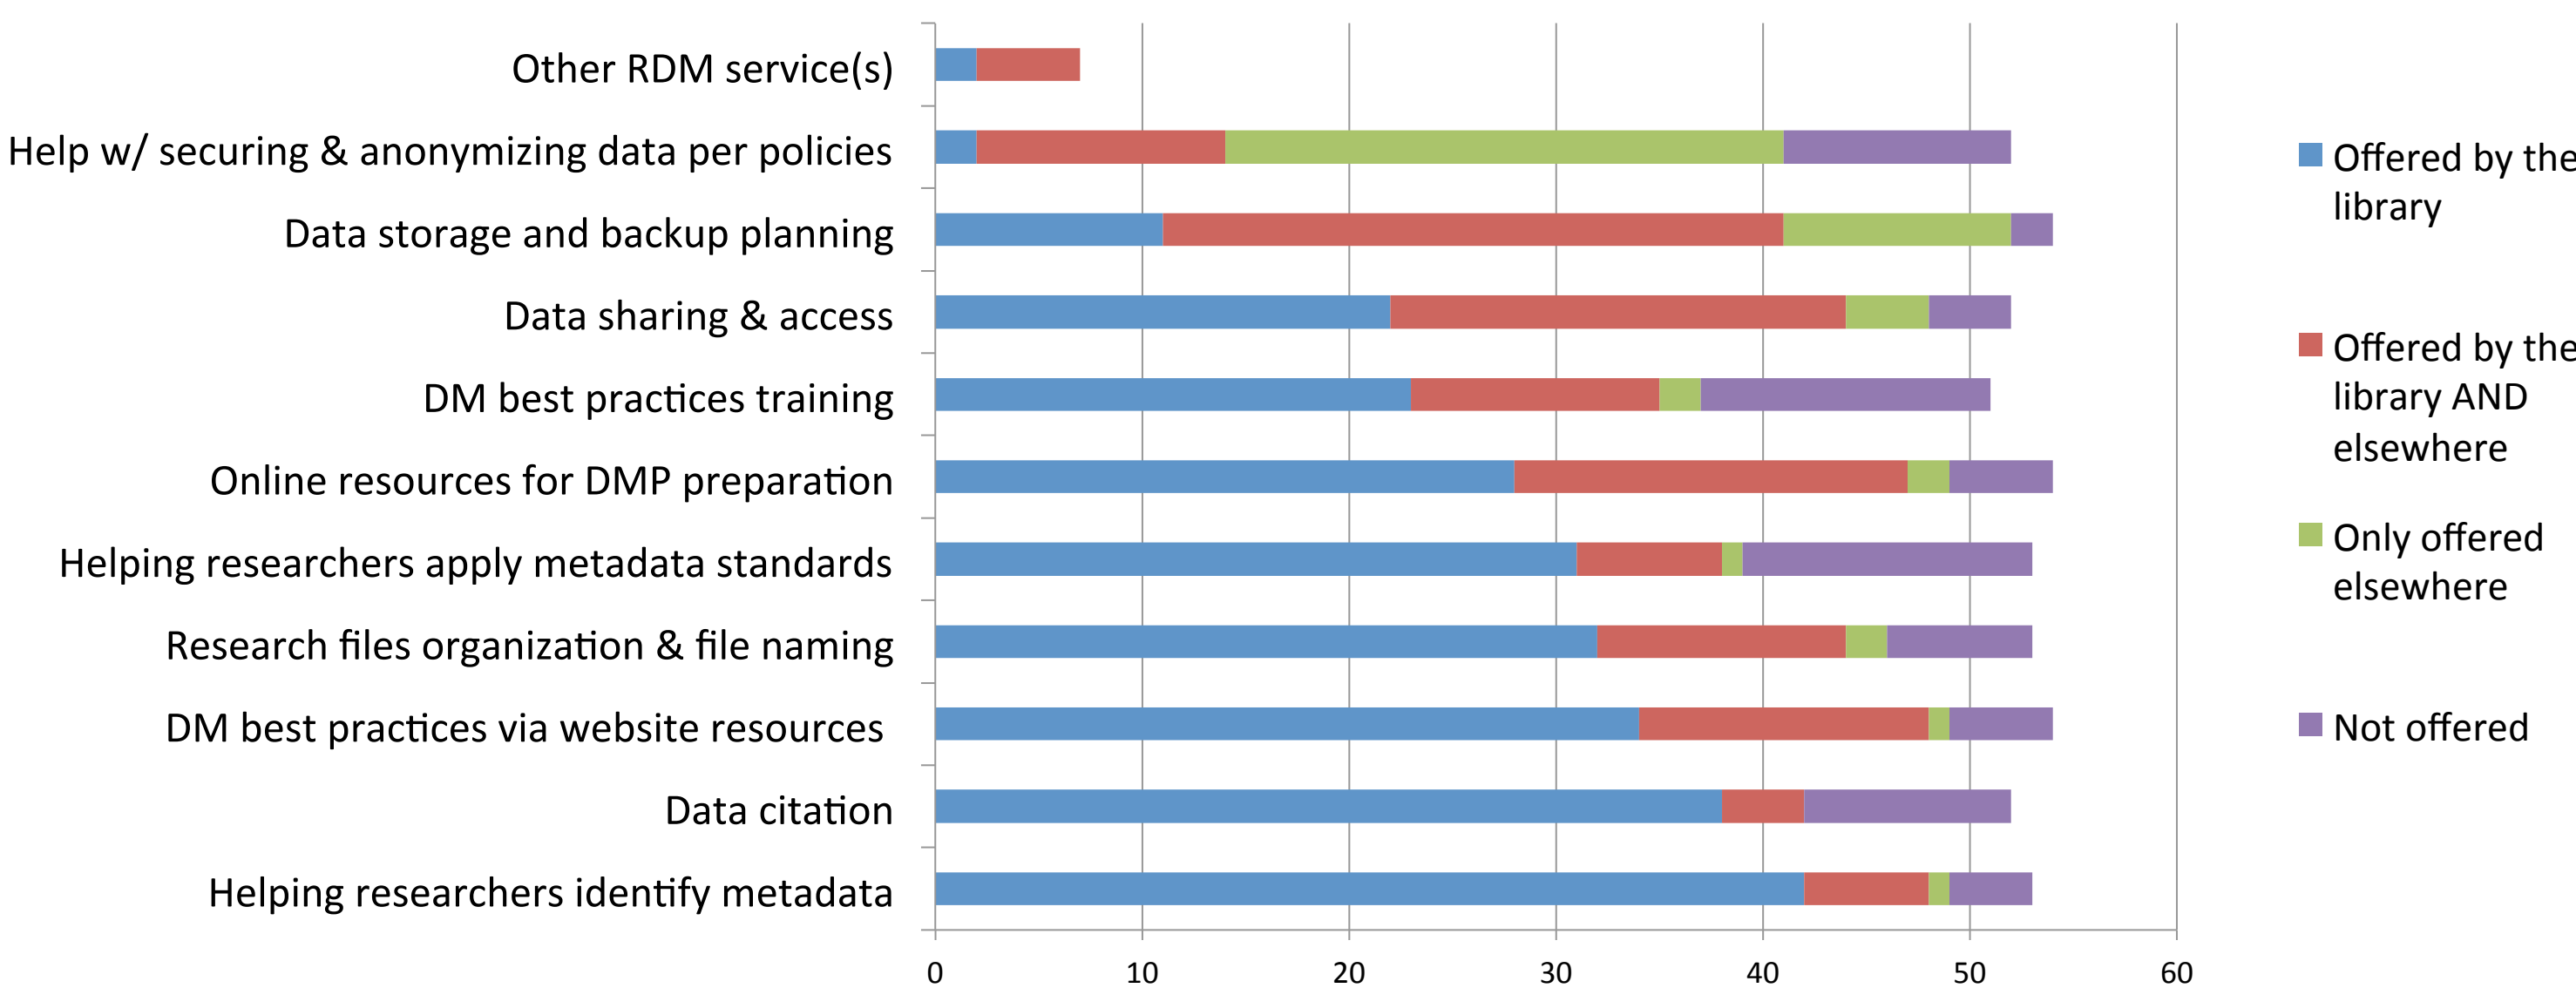

### Staffing: Organization Structure for RDM Services

### Library Referrals Across Campus

## Campus-wide Research Data Management Service Support

## Lessons Learned

- Campus wide communication and collaboration enables the possibility of providing a wider range of RDMS services and support
- RDMS services provision requires an investment in human resources and technical infrastructure
- More ongoing engagement with researchers is needed to continue to build awareness and value of RDMS services
- There are lots of opportunities for continued service growth and development by the library and/or in partnership with other campus units
- RDMS service and support models are as diverse as the needs of different campus research environments, no one model fits all situations
